

Vivet Therapeutics Appoints Eduardo Bravo as New Chairman of the Board

PARIS, France June 12th, 2018, Vivet Therapeutics, a biotechnology company developing novel gene therapies for rare, inherited metabolic diseases today announced the appointment of Eduardo Bravo as Chairman of its Board of Directors. Eduardo Bravo takes over from Dr. Florent Gros who served as Chairman since the creation of Vivet Therapeutics.

With more than twenty-five years' experience in the biopharmaceutical industry, Eduardo Bravo has a strong track record in leading international biotech and pharmaceutical organizations. As CEO of TiGenix since May 2011, he successfully developed the company through several financing rounds, led its IPO on NASDAQ, and secured EMA approval of its lead asset. Prior to joining TiGenix's predecessor, Cellerix, in 2005, he held several senior management positions at Sanofi-Aventis and SmithKline Beecham. Mr. Bravo holds a degree in Business Administration and an MBA (INSEAD). He is President of the EBE (European Biopharmaceutical Enterprises) Board of Directors and member of the Executive Committee of ARM (Alliance for Regenerative Medicine).

Commenting on his appointment, Eduardo Bravo stated, *"I am very excited to join Vivet, a very promising biotech company committed to making a significant difference for patients with rare metabolic diseases. Vivet's world-class team combined with outstanding science in gene therapy will help make innovative treatments available to patients and change the treatment paradigm for those diseases."*

Dr. Jean-Philippe Combal, CEO of Vivet and Dr. Florent Gros, former Chairman of the Board added: *"We are pleased that Eduardo Bravo is joining us. His solid experience in the pharmaceutical industry and biotechnology with successful programs and partnerships will be instrumental in guiding Vivet's strategy in the gene therapy field."*

Dr. Jean-Philippe Combal concluded that *"with the appointment of Eduardo to our Board of Directors, I am very confident that we have a Board with the experience and skills set to help accelerate the growth and development of Vivet as we continue to advance our gene therapy programs."*
